A. PROGRAM DESCRIPTION

1. Background and Rationale for the Program

Russian Federation is experiencing concentrated HIV epidemic among members of Key Populations, which is expanding on significant scale. The HIV epidemic information is mostly based on state reported data by the Ministry of Health of Russian Federation statistical compendium (2013). Total number of registered new HIV cases in 2013 was 77,896, which is 10% higher compared to 2012. According to official statistics 57% of HIV positive people detected in 2013 had identified risk factor - injecting drug use (41,7% in 2012; 55,8% in 2011, and 56% in 2010). The heterosexual transmission was reported among 41% of new cases in 2013, sexual transmission among men who have sex with men is reported among 1% of new cases, which is probably underreported due to high stigma and discrimination. The sex work is illegal in the country and hence no data is collected or reported for this group.

The country does not report data to WHO or UNAIDS, the latest country progress report and data from UNAIDS is available for 2010. There is no SPECTRUM estimation data available for the Russian Federation.

According to the WHO "Key Facts on HIV Epidemic in Russian Federation and Progress 2012" info note, taking undiagnosed infections into account, the UNAIDS and WHO estimate that
between 730,000 – 1,300,000 people were living with HIV in the Russian Federation at the end of 2011.

**Program Rationale**

The main program focus under the New Funding Model is mainly aimed at filling the significant programmatic and financial gaps in the current national response to HIV epidemic in the country, first of all, due to the absence of the state support and recognition of evidence-based internationally recommended prevention services for the Key Populations: People who Inject Drugs (PWID), Sex Workers (SWs), and men who have sex with men (MSM).

The program continues the activities initiated under two HIV/AIDS "NGO charitable donations" in Russia (RUS-304-G01-H and RUS-506-G05-H) and is aimed to create environment for integration of the evidence-based prevention programs into the national HIV strategy and to promote further sustainability. It is planned to strengthen the communities of Key Populations in order to increase their involvement in the dialogue with the authorities for the access to evidence-based HIV prevention, treatment, care and support services, including those provided by the state healthcare system.

2. **Goals, Objectives and Key interventions**

**Goal:** Contributing to building and strengthening of the national legal, methodological and financial framework to enable sustainability and expanding coverage of the Key Populations with the HIV prevention services, HIV/AIDS treatment, care and support.

**Objectives:**

- Support prevention interventions to keep the same level of HIV prevalence in the selected regions among Key Populations – PWID and their sexual partners, commercial sex workers, men having sex with men.
- Strengthening advocacy to overcome the legal barriers limiting the access to treatment and integration of the evidence-based prevention interventions into the national strategy to fight the spread of HIV infection.
- Strengthening systems of the communities of the key groups – PWID, SWs, MSM, for the protection of their rights, increase access to services and advocacy activities for HIV prevention among vulnerable populations.

**Key Interventions:**

- Prevention programs for PWID, SWs and MSM
- Community systems strengthening
- Removing legal barriers

3. **Target Group/Beneficiaries**

- PWID
- SWs
- MSM
